- **Languages:** C, C++, Python3, HTML, CSS, JAVASCRIPT.
- **Frameworks:** LSTM, NLTK, Tensorflow, OpenCV, MySQL, tkinter.
- **Tools:** Codeblocks, V S Code, Python IDLE, PyCharm, Anaconda, Scikit-Learn.
- **Platforms:** Linux, Windows, Command Line Interpreter (CMD).
- **Soft Skills:** Coding, Leadership, Event Management, Time Management.

PROJECTS

- **Stock price prediction system using Machine Learning-** (Completed) Ability to predict direction of stock/index price accurately is crucial for market dealers or investors to maximize their profit.
- **Colour Detection Using Python-** (Completed) Colour Detection is necessary to recognise objects, it is also used as a tool in various image editing and drawing apps.
- **Chatbot using Python-** (Completed) Chatbots can provide real-time customer support and are therefore a valuable asset in many industries.
- **Real time Human detection and counting-** (Completed) An application which allows to detect human or people's in any image, video or even through camera. Also, along with detection, it also counts the maximum number of people appeared.
- **Web Scraping-** (Ongoing) Web scraping is the process of using bots to extract content and data from a website. Unlike screen scraping, which only copies pixels displayed onscreen, web scraping extracts underlying HTML code and, with it, data stored in a database. The scraper can then replicate entire website content elsewhere.

ACHIEVEMENTS

- 5* in HackerRank.

Volunteer Experience

- **Member at NSS GEU**

Dehradun, India
November 2022 - Present
